

# OfficeServ™ Wireless

## Enterprise In-Building Mobility Solutions

Samsung OfficeServ Wireless is setting a new standard for enterprise wireless communication. The new Samsung OfficeServ SMT-W5100E Handset, communicating with SMT-R2000 Dual Band Wireless Access Points, bring a new definition of what power really means to wireless voice and data users.

Treat yourself to more control over your productivity with this wireless mobility solution. It starts with the new trim handset you carry, to a longer lasting battery source serving it, and added calling features usually expected in your cell phone. And the power is extended to an unlimited number of access points supporting your coverage area. Together, the SMT-W5100E allows you to experience a difference that's real, real—time and real—world.

Professionals like you, demanding productivity while you are on the move, will appreciate the latest 802.11g technology upgrading your handset performance and your expectations in our wireless world. And it's here at the right price.

**We Are Talking Affordable**

**We Are Talking Smart Design**

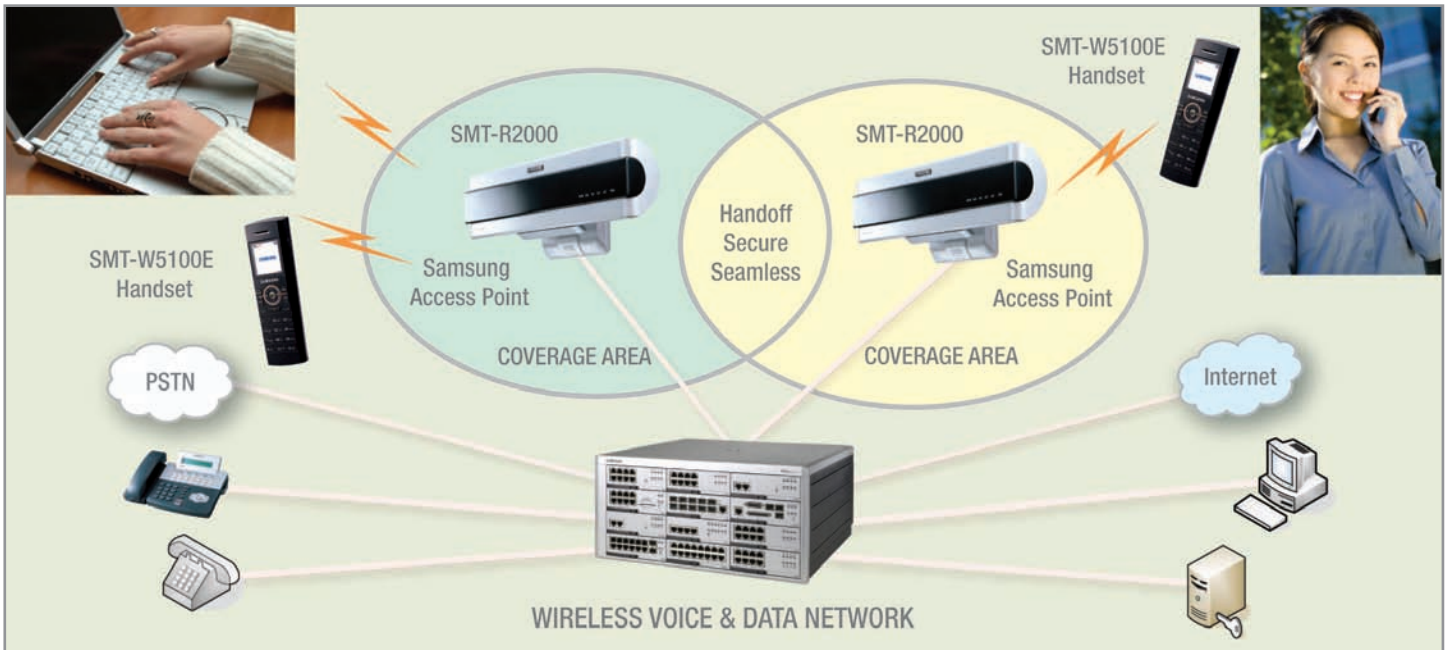

**We Are Talking Mobility That Really Mean Something**

Accessory Kit Included

# OfficeServ™ Wireless Network
